Ethnography Proposal

Group Name

I will research the cooks at Patio.

Purpose

My goal is to see how the cooks at Patio and
how they are similar .

Assumptions

- Cooks' outfits match.
- They know how to cook everything on the menu at their restaurant.
- They didn't go to college or pursue further education.
- Cooking is a hard job to get because you have to work your way up through the "ranks".

- People get jobs in restaurants because they have a degree or something they want to do that they can't get a job in.

Research Questions:

- How many cooks have college or higher learning?
- Are the cooks who have a further education looked up to by others?

Obstacles:

- The restaurant hours don't match my schedule.
